HOUSE & GARDEN PETS AGRICULTURE FORESTRY & HUNTING

Kombio *Natural*

GARDEN AND LAWN Fertilizer and plant strengthening

KombioPLEX is an organic-mineral slow release fertilizer that does not allow burning or overfertilization and can be used for all types of flowers, shrubs and grasses.

Ubikwit, a probiotic soil adjuvant to promote humus formation and nutrient availability. Strengthens leaf and roots development.

LAWN SEED

We have the right mixture for every location:

- Ornamental lawn
- Utility lawn
- Park lawn
- Play and sports turf
- Landscape lawn
- Shade-tolerant lawn
- Various flower seed mixtures and insect pastures

VEGETABLE & RAISED BED SOIL ACTIVATOR + PROBIOTIC IRRIGATION ADDITIVE

Our soil revitalization system for productive and vital vegetable & raised bed soil, as well as enriched plant substrates.

Our high-quality **soil activator** is a concentrate, highly productive and shall be used with substrate in a ratio of 1:5. The activator triggers the natural humus build-up and ensures a long-term supply of nutrients – immediate results show in improved plant growth.

For the perfect start, our **meine biotik** probiotic irrigation additive is included with the **soil activator**. This strengthens the immune system, promotes nutrient uptake, and enhances plant vitality & energy.

The **soil activator** is produced with regional and cycle-oriented raw materials. Compost from forest greens and shrub cuttings, organic fertilizer to fully supply your plants, probiotic fermentation products, clay minerals, rock flour and valuable humic substances conclude the ingredients.

WOOD DECOR

Naturally colorful to decorate your garden borders and paths

Made from coniferous wood from the immediate vicinity, the decor is dyed with nature-friendly earth pigment colors. Due to the drying with internal produced warm air, the product is especially long-lasting and color-stable. **Wood decor** protects the soil and roots from drying out, prevents weed growth and inhibits snails.

AVAILABLE IN 6 COLORS: brick red, natural, chocolate brown, nut brown, golden yellow, orange

NATURAL HELPERS IN HOME AND GARDEN

Everything in order with microorganisms!

Does the plant soil, the drain or your pet smell? Microorganisms are the reason - microorganisms are also THE SOLUTION.

Our probiotic products ensure a restoration of a healthy and balanced system - not only in case of bad odor

IN THE GARDEN

liquid ferment for vital plants

- Ornamental & balcony plants
- Plants Strong
- Garden
- Lawn cure

IN THE HOUSEHOLD

probiotic household cleaner

for all surfaces

FOR YOUR PET

Supplementary feed for vital animals

liquid ferment with assorted herbs

- Horse
- Cat
- chicken, runner ducks & quail
- Dog
- Rabbit & bunnies
- Animal skin

POND SPRING TIP

You can no longer see the pond due to algae?

morlive aktiv liquid ferment and ultra fine rock flour

Strengthen the system already when filling the pond
Manually: pre-mix 1lt **morlive aktiv** and min 30 lt pond water. (Basis ratio 1:10.000 = 1 lt per 10m3). Add ultra-fine rock flour (e.g. zeolite, biolite) (at least 2kg per 100 m3), let the mixture stand for one hour and then spread it over the whole pond. Especially in the plant area and on algae!

Automatic: let Morlive aktiv drip in continuously (e.g. 1 drop/minute) when using inflow/circulation system

WET FOOD FOR DOGS AND CATS

Our all-round package for your pet

Wet food for dogs and cats from „die futterquelle“. produced from the best, specially selected raw materials with great emphasis on Bavarian origin and regionality.

DRY FOOD FOR RODENTS, PET BIRDS, WILD BIRDS AND WILD ANIMALS

A brand from

NEW: WHOLESALE REPRESENTATIVE FOR BSV SEEDS IN AUSTRIA

Bayerische
Futtersaatbau GmbH

For over 90 years, **BSV-Saaten** has placed great emphasis on quality in the production of seeds.

The branded seed stands for quality and innovation and for a short and direct path from the advances in plant breeding to agricultural practice. With over 2,500 hectares of propagation, primarily in Germany but also in neighbouring countries, as much seed as possible is produced by **BSV-Saaten** itself. Raw material is received regionally in the Bavarian area.

In addition to agricultural seed, lawn seed and premium pet food are offered under the brands **EXPONA**, **DEKOR** and "**die futterquelle**". These are produced by carefully selected farms. This ensures that the lawn seed and feed are made from the best raw materials and are of the highest quality.

As we are convinced by the concept of BSV-Saaten, we at **G11** have decided to expand the existing cooperation and to take over the wholesale representation for Austria. We would like to make these products, which are best adapted to our climatic conditions, available here in Austria through competent advice.

GRASSLAND/CROP SEEDS

- Permanent grassland
- Grassland improvement (reseeding)
- Field fodder mixture
- Cover crop cultivation
- Flower mixture
- Special mixtures for horses, sheep, chickens, ...
- Single seeds (grasses, legumes)

HUNTING

Coordinated game grazing mixtures with rich herbs

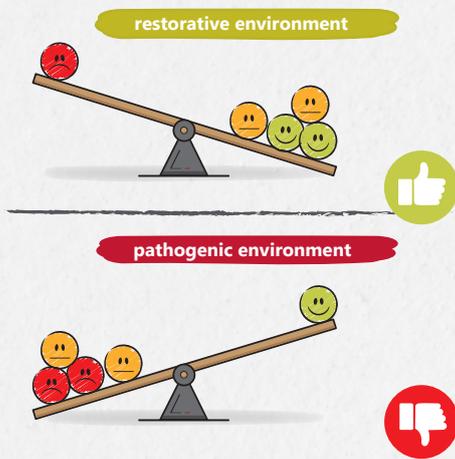

BEEKEEPING

Seed mixes of wild & cultivated species that are eager to bloom and rich in nectar for the whole season

OUR PRINCIPLE OF ACTION IS COPIED FROM NATURE

NATURAL HELPERS IN THE STABLE

Ubikwit preparations are a fermentation product of lactic acid bacteria and nutrients. They influence the environment in which they are introduced. Regular use creates a species-rich, healthy and balanced environment.

Kombio *Natural*

HYGIENE, MANURE / SLURRY

Through „probiotic stable disinfection“ with **Ubikwit**-preparations, all negative properties of manure and slurry disappear. They become more valuable for soil fertility and humus build-up. The manure becomes much more homogeneous, richer in nitrogen and enriched with valuable lactic acid bacteria.

Regular application of **Ubikwit** in the barn can significantly reduce the cleaning effort and disease pressure in the barn.

ANIMAL HEALTH

Ubikwit F. The fermentation of assorted regional organic herbs, natural lactic acid bacteria and yeasts results in a product that can be used as a supplementary feed for all types of animals.

It stimulates appetite, aids digestion and supports the immune system and vitality of the animals.

PLANT CULTIVATION

Ubikwit S. Liquid ferment produced by cascade fermentation from valuable microorganisms. Improves nutrient availability, plant resistance resulting in enhanced root and leaf growth.

G11 - WE LIVE (ECO)LOGICAL DIVERSITY

In the past years, the G11 Unternehmensverbund AG has been engaged in development of a company group concept at the location in Gmünd. We want to increase the efficiency of the biomass power plant, as well as to use the resources and residual materials available at the site for each other, thus meeting our ambitious requirements for sustainable production.

A composting plant has already been implemented - green waste from forest chips is expertly composted here together with regional green waste. The biological use and the sorting of the green parts from the forest wood chips improves the wood chips as a thermal raw material for the biomass power plant and thus contributes to an increase in efficiency.

The production of dried wood decors has also been realized and enables us to strengthen the purchase security from our suppliers and to use the locally available thermal energy, away from the extraction peaks for the district heating network.

Products and services from the company's environment, such as the production of probiotic fermentation products and organic fertilizers, wood trading and the distribution of seeds, have been integrated into the company to complete the portfolio.

Other ambitious projects to further increase the use of resources at the site continue to be worked on with great dedication.

Our own brands, as well as the products of our valued partners, share two characteristics: **regionality & sustainability**. For years we have been relying on regional raw materials, short transport routes and gentle manufacturing of our products.

With us you get knowledge, service and friendliness from one source. Let us also advise you individually on site in our store.
